German – average

Professional experience

Contract developer working on Squadrunner REST API backend Django REST framework, Django nonrel, mongodb September 2014

Google Summer of Code student, Summer 2014 Systers Portal at Systers, an Anita Borg Institute Community Django, PostgreSQL

Google Summer of Code student, Summer 2013 Mail/Notification related functionality at MoinMoin Flask, whoosh

Developer at Red Sky, Sept. 2012 - May 2013, Project CarOcean, Python Developer (Scrapy framework) SMS related projects, PHP Developer (Zend framework)

Summer internship at Dekart, July 2012, Developed a windows gadget "Amazon Metrics Monitoring"

Personal skills and competences

Programming and markup languages

Python – solid (4 years)

Django web framework – solid (3 year)

Django non-rel with MongoDB - medium

Flask lightweight web framework - medium

Java and Android SDK - medium

Scrapy - scraping and web crawling framework - medium

PHP / Zend web framework / Symfony framework - medium

HTML & CSS - medium

JavaScript / jQuery - medium

Tools and competences

Algorithms and data structures

Web development

Web crawling

OOP, UML

MySQL, Django ORM

Test Driven Development

Git, Mercurial

Scientific computations in Python

Open Source

Linux, vim

Heroku

LATEX

Traits

Hardworking

Focused

Disciplined

Community oriented

Teamwork friendly

Open source contributions

Systers Portal – core developer and maintainer of a platform written in Django for Systers communities to post and share information.

Code: https://github.com/systers/portal.

Website: http://portal.systers.org/.

Moin2.0 – wiki engine written in Python.

Code: change subscription mechanism and other enhancements.

SugarLabs – learning software for children, part of One Laptop Per Child project.

Code: bugfix 1 and bugfix 2.

Publications

"Simulating NoSQL databases in Django ORM", co-auther Alexandr Truhin, ICMCS 2012

"Dataflow programming using Qt framework" , ICMCS 2011 – extending functionality for the open source educational application KGeography using C++ and Qt

Involvement

Personal Projects

"Meow Letters" educational game developed using Java Android SDK as an open source project within the "Learn IT, Girl" mentorship program.

Code: https://github.com/ana-balica/meow_letters.

Game: Google Play Store.

"Meow Letters" cross-platform game developed using Kivy Python framework.

Code: https://github.com/ana-balica/meow_letters_py.

"Bug Life" Javascript project, that represents a visualization of a GitHub repo issues.

Website: http://9-volt.github.io/bug-life/. Code: https://github.com/9-volt/bug-life.

Development of FAF (English Taught Honors Program in "Computer Science") website. Setup and administration of FAF wiki.

Code - https://github.com/TUM-FAF/FAFSite.

Talks

Upcoming: "Demystifying mixins with Django" talk at DjangoCon Europe 2015
